They may have split up over two years ago, but it seems that Katie Price has reunited with Peter Andre.

The pair were photographed making up for lost time amongst bales of hay in a stable.

Both wearing sunglasses but still managing to gaze into each others eyes, Katie and Peter - who met on reality TV show *I'm A Celebrity...Get Me Out Of Here* - finally realised their love for one another.

It can't be real: Alison Jackson creates a steamy reunion between Katie Price and Peter Andre using professional lookalikes

But before fans get too excited, they should take a closer look.

The two celebs rolling amongst the straw are in fact lookalikes of the famous pair - who have been snapped by photographer, Alison Jackson.

The 41-year-old is well-known for her work in which she uses professional doubles to create the images that the public would love to see.

Wearing a leather jacket with denim jeans, pop star Peter Andre's doppelganger can be seen holding his ex-wife and forgiving her for her short-lived marriage to Alex Reid and fling with an Argentinian model.

Katie's lookalike wears a white printed t-shirt, a pair of skinny jeans and black knee-high boots as she rekindles her romance with the father of her two children.

But in real-life the chances of Katie and Peter reuniting are far from realistic.

After splitting with Leandro Penna this month, the former glamour model is reportedly dating rugby player, Danny Cipriani.

Much to the disappointment of their fans it seems that Katie and Peter have no plans to bury the hatchet and certainly won't be rolling around together anytime soon.

But Alison - who has won a BAFTA for her BBC hit programme *Doubletake* - definitely came close to recreating the reality TV romance.

Recreating the romance: Fans can take a closer look at the images in this week's Heat magazine which is out now
